

List of Poster Presentations

- P01 Regioselective one-pot protection of D-glucosamine
- P02 Enzymatic synthesis of UDP-galactose by glucose-1-phosphate thymidyltransferase and the application in LacNAc synthesis
- P03 Efficient and alpha Only Preparation of $\alpha(2\rightarrow9)$ oligosialic acids by using convergent block synthetic strategy
- P04 Highly alpha-selective sialyl phosphate donors for efficient preparation of natural sialosides
- P05 Biosynthesis of glycosylated flavonoids by whole cell biotransformation system with genetically engineered *Escherichia coli*
- P06 Regioselective synthesis of di-C-glycosylflavones possessing anti-inflammation activities
- P07 Synthetic studies of glycopeptide- α thioester segments of erythropoietin
- P08 Synthetic study of erythropoietin having complex type disialyloligosaccharides
- P09 Development of photoaffinity probe and its application on finding cell surface interacting protein
- P10 Paramagnetic-tagging approach for NMR characterization of N-linked oligosaccharides
- P11 Carbohydrate microarray based on aluminum coated glass slides
- P12 Functional carbohydrate chip platform for analyzing carbohydrate-protein interaction and assaying glycosyltransferase activity
- P13 Galactose encapsulated multifunctional nanoparticle for HepG2 Cell internalization
- P14 Site-specific enzyme immobilization on magnetic nanoparticle for practical applications
- P15 Discovery of antibodies by phage display human scFv antibody library
- P16 Development of a glycan cancer vaccine against Globo-H for breast cancer
- P17 Development of GlcNAc-inspired iminocyclitiols as potent and selective N-Acetyl--hexosaminidase inhibitors
- P18 Bacterial transglycosylase as a drug target
- P19 High-Throughput Identification of antibacterials against methicillin-resistant *Staphylococcus Aureus* (MRSA) and the transglycosylase
- P20 Vaccination of monoglycosylated hemagglutinin from seasonal influenza H1N1 provides cross-protective immunity against pandemic 2009 H1N1 virus infection in mice
- P21 Differentiation of influenza virus subtypes by Naked-eye recognition: formation of colorimetric fingerprints using glycan array
- P22 Differential receptor binding affinities of influenza hemagglutinins on glycan arrays
- P23 High-throughput identification of compounds targeting influenza RNA-dependent RNA polymerase activity
- P24 Host range mutation of influenza viruses
- P25 Anthocyanin of black soybean protects alcohol-induced neuronal cell death
- P26 Immune stimulating activity of low-molecular weight fuco-oligosaccharides prepared by enzymatic hydrolysis of Fucooidan from *Undaria pinnatifida* sporophyll
- P27 Isolation of a new low-molecular-weight polysaccharide fraction from *Dendrobium huoshanense* with potent biological activity
- P28 Purification and characterization of an exo-type β -N-acetylglucosaminidase (NagA) from *Pseudomonas fluorescens* JK-0412
- P29 Partial purification and characterization of a β -D-glucosidase from the gut of the scallop *Patinopecten yessoensis*
- P30 Purification and properties of an endo-polysialidase from *Pseudomonas fluorescens* JK-0412
- P31 Expression and functional analysis of *M. tuberculosis* GlcNAc-1-phosphate transferase
- P32 Single mutation of D-sialic acid aldolase is sufficient for controlling the substrate specificity
- P33 Characterization of mucins by using SMME and composition-based arrangement of mass spectral data
- P34 In vitro enzymatic synthesis of O-linked glycans and their application
- P35 Rapid glycoprotein analysis by hybrid lectin-phenylboronic acid functionalized magnetic nanoprobe-based

affinity mass spectrometry

- P36 Immunostaining for characterization of mucins using supported molecular matrix electrophoresis
- P37 Development of trifunctional probes for glycoproteomic study
- P38 In vivo tracking of glycosylation in zebrafish cell line
- P39 Site-specific N-glycan analysis of oral cancer cell
- P40 A unique N-glycan in cerebrospinal fluid: a possible biomarker for idiopathic normal pressure hydrocephalus
- P41 Sialyl-Tn (sTn) carrier protein in gastric and lung adenocarcinoma
- P42 Verification of two glyco-biomarkers estimating the degree of progression of liver fibrosis
- P43 Overexpression of GD2 and other glycan epitopes on glioblastoma stem-like cells
- P44 Identification of glycan-associated markers for cholangiocarcinoma
- P45 Glycoproteomic approach for cholangiocellular carcinoma markers
- P46 Expression and functions of glycosphingolipids carrying C4-hydroxylated sphinganine in pig small intestine
- P47 Advanced mass spectrometry and chemical analyses reveal the presence of terminal disialyl Motif and sulfated sialyl LacNAc on mouse B cells
- P48 β -1,4-galactosyltransferase III suppresses neuronal differentiation and neurite outgrowth by modifying glycosylation on B1 integrin
- P49 The role of FUT8 in lung cancer progression
- P50 Modification of glycans and glycopeptides by human glycosyltransferases expressed by a methylotrophic yeast *Ogataea minuta*
- P51 Changes in α -2,3 sialylation of glycoprotein carbohydrate during glucose-deprivation of neuron cells
- P52 Effect of black soyebean anthocyanin on the alteration of α 2,3-Sialyltransferases gene expression during hydrogen peroxide-induced cell death
- P53 Screening for glioblastoma stem cell markers
- P54 Knockdown of T-synthase prolongs skin allograft survival with suppression of CD8+T cells and induction of galectin-1 secretion
- P55 High-throughput Substrate profiling of ppGalNAc-Ts
- P56 Molecular basis of the glycoprotein-fate determination governed by the intracellular lectins
- P57 Galectin-1 induces B cell activation and promotes immunoglobulin production
- P58 N-Glycosylations on megalin regulate its ligand-binding capacity in mouse kidney
- P59 Sialylation and fucosylation of epidermal growth factor receptor suppress its dimerization and activation in lung cancer cells
- P60 NMR studies on structural changes of IgA1-hinge peptide upon glycosylation
- P61 Structural and functional characterization of the first N-glycosylated snake Venom Phospholipase A₂
- P62 NMR analyses of the interaction between amyloid B and GM1 clusters
- P63 The functional study of O-GlcNAc modification on tubulin alpha and beta
- P64 O-GlcNAc modification affects myogenin expression and differentiation of myoblast C2C12
- P65 Glucosamine modulate LPS-induced iNOS expression via O-GlcNAcylation of NF-kB p65
- P66 Measurement of the lateral diffusion of growth factor receptors in membrane microdomain by live cell imaging system
- P67 Carbohydrate-mediated cell-cell interactions on membrane microdomains of gastrula stage embryo of medaka fish
- P68 Differential expression of MUC20 in trophoblasts of human placenta and its suppressive role in trophoblast-like cell invasion
- P69 Keratinocyte-derived laminin-332 promotes adhesion and migration in melanoma cells
- P70 Chondroitin sulfate is essential for normal endochondral ossification
- P71 The E-type structure of chondroitin sulfate on tumor cell surfaces is involved in lung and liver metastases
- P72 Japan Consortium for Glycobiology and Glycotechnology DataBase
